

To Whom It May Concern,

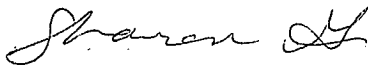

I recently purchased a modified residential vehicle for my daughter with highly involved special needs, from Ride-Away Handicap Corporation. It is a beautiful Honda Odyssey with a lowered floor and rear-entry to accommodate her very large powered wheelchair. The van is not only beautiful, but very safe and accessible means of transportation.

We have been long time customers of Ride-Away for over 14 years and this is our third vehicle purchased which included trade-ins as well. The recent purchase of our new Honda was a very positive experience because of the Sales Consultant, at Ride-Away, Eric Lajeunesse. He was outstanding, and our best salesman ever!

Eric Lajeunesse, I recommend to anyone interested in learning and educating themselves about wheelchair modified vehicles, both residential and commercial. Ride-Away has many different adaptive devices and equipment available for all kinds of transportation. It is truly amazing that such beautiful ADA complaint vehicles are available to help people with all kinds of challenges. My daughter and I are very blessed to have worked with Eric Lajeunesse, at Ride-Away.

After formally working with Eric, it is my opinion that he truly demonstrates an understanding of the issues faced by people with special needs in our world today. I would be please to refer his devotion, reliability and skills to others in hopes of creating dreams of "freedom delivered by Ride-Away the largest retailer of modified vehicles".

Sincerely,

Sharon G
